

Transmission Department Manager

Location: Billings, Montana

Description: Electrical Consultants, Inc. has an immediate opening for a Transmission Department Manager responsible for multiple transmission and distribution design teams in our Billings, Montana office. The successful candidate will serve as a Senior Project Manager and Department Manager responsible for conceptual, preliminary, and final design of T&D projects 4160 V through 500 kV.

Departmental responsibilities include training, mentoring, implementation and refinement of standards, multiple project management, and QA/QC review. Candidates must possess excellent communications, organizational and writing skills as necessary to support the design and management of major transmission and distribution projects throughout the country. Responsibilities also include multi-office coordination, estimating, and scheduling of activities related to transmission and distribution project work. Occasional travel is required.

Minimum Requirements: BSEE or BSCE, and PE license. 10+ years of transmission design and project management experience in the utility engineering industry. Candidates must possess a solid working knowledge of the PLS-CADD suite of design software tools and be well versed in the design of wood, steel, and concrete pole design as well as lattice steel tower design. Excellent communications, organizational, and writing skills are a must as candidate will be responsible for QA/QC review of project design documents from multiple teams including Technical Line Designs, plan & profile (structure spotting), staking sheets, contracts and specifications. Presentation of some project materials to the public and other agencies may be required. In addition to PLS-CADD, proficiency in MS Word, Excel, PowerPoint, and Adobe software is required. Additional skills in other MS, ESRI, Adobe, AutoCAD and Bentley products are a plus.

Salary commensurate with experience and education. Benefits package includes:

- Health, Dental and Vision Insurances
- 401(k) Retirement plan
- Profit Sharing up to 15% of base wage
- Paid vacation, personal days and holidays
- Paid Professional Society Dues
- Continued Professional Education Reimbursement

Electrical Consultants, Inc. (ECI) employs over 200+ engineers, technicians, surveyors and support staff in offices across the west and Midwestern U.S. The firm has over twenty years of experience in design and permitting of a wide range of high voltage transmission lines, power distribution facilities, substations, communication systems and wind energy projects.
